### TECHNICAL DATA

Power supply and output:	220 - 240 V~, 50/60 Hz, 950 W
Temperature monitoring:	Variable resistor sensor (NTC)
Safety system:	Thermofuse
Heating power:	950 W
Pump:	Max. 15 bar, 48 W
Overpressure valve:	Opens at. 18-20 bar
Power absorption:	During the heating phase approx. 4,1 A
Dimension h x w x d in mm:	296/170/260
Weight:	Approx. 3,9 kg
Water tank capacity:	Approx. 1,2 lt
Heater capacity:	Approx. 10 ccm
Water circuit filling time:	Approx. 5 sec. for first filling cycle
Heating time:	Approx. 70 sec. with water at 10°C
